Mohammad Yunus Ali

PYTHON,FLASK,DJANGO,AWS,MYSQL,Sqlite3

I am a skilled Python web developer with 2.5 years of hands-on experience in building web applications using Flask and Django. My expertise lies in building Api and implementing robust, scalable, and efficient backend systems. In my role as a backend developer, I have successfully delivered multiple projects, demonstrating a strong understanding of both Django and Flask frameworks. I am proficient in utilizing Django's powerful features such as the ORM, authentication, and templating engine to create secure and feature-rich web applications. Additionally, I have leveraged Flask's lightweight and flexible architecture to develop smaller, quick-to-deploy applications.
