software project bidding in USA

Dynamic and results-driven Project Bidding Specialist with 1 years of experience in the competitive landscape of construction and engineering projects. Proven track record of successfully securing high-value contracts through meticulous research, strategic bidding, and client relationship management. Expertise in analyzing RFP/RFQ requirements, developing compelling proposals, and negotiating favorable terms. Strong understanding of industry regulations and market trends. Adept at leading cross-functional teams and collaborating with stakeholders to deliver winning bids on time and within budget.

Projects

Virtual assistant

Backend Jul 2022 - Feb 2023

I am a proactive backend developer with hands-on experience in contributing to a virtual assistant project from July 2022 to February 2023. My role involved developing platform-independent voice recognition software using Python. This software aimed to enhance user productivity by automating tasks such as weather reporting, reminders, and shopping lists through intelligent voice interaction. I am adept at integrating predefined invoking words for seamless user interactions and am committed to leveraging technology to streamline daily operation
