Summary

Seasoned backend developer with one year of experience, showcasing a successful track record in optimizing live trading applications with expertise in C++, HTML, CSS, JavaScript, Node.js,, Redis, and Kafka. Acknowledged for enhancing functionality, introducing features, and effective collaboration within a dedicated team of four. Committed to excellence and contributing to the ongoing success of leading trading platforms.

Experience

63 moons technologies limited	20-02-2023 to 20-02-2024
Trainee	Mumbai

As a backend developer, I played a key role in advancing a live trading application by introducing new features and resolving existing issues. Collaborating with a team, we utilized technologies like C++, HTML, CSS, JavaScript, Node.js, Redis, and Kafka to optimize performance. This transformative experience, lasting one year, enabled me to meet the dynamic requirements of a leading trading application.
