EXPERIENCE

Front End Developer — Feb 2023 - Present
All Friends Studio — *MG Road, Gurugram, Haryana*

- Developed onwork.ai from inception, harnessing **HTML, CSS, JavaScript, and jQuery, and seamlessly integrating custom plugins** to architect a vibrant and interactive platform. Enriched with playful user interactions and captivating animations, it delivers an engaging user experience.
- Build onwork.ai dashboard from scratch using **HTML, Materialize CSS, JavaScript, JQuery and Google Charts to visualize user behavior**. Integrated Leaflet map for displaying user traffic.
- Developed **Ludo Junction Game**, a user-friendly website allowing easy login via email or phone with OTP verification. Seamlessly manage coins for adding and redeeming, with a sleek frontend designed from scratch using **HTML, CSS, Materialize CSS, and JavaScript**.
- Developed DWFritz website with custom functionalities and modern design, also crafted a responsive landing page for an ad campaign. Integrated custom Pardot forms in DWFritz to drive lead generation effectively

Front End Developer (Internship) — Nov 2022 - Feb 2023
All Friends Studio — *MG Road, Gurugram, Haryana*

- Constructed a furniture showcasing website using **WordPress** for Encore Prime Furniture.
- Designed and developed projects for US-based agricultural companies like Farmscan, focusing on specialized product sales, all crafted with WordPress.
- Developed services site for Windsor Valet and SSB Academy integrating Divi and customizing functionalities.

PROJECTS

Hotstar-Disney Clone. This project is a clone of the Hotstar-Disney platform, built using **React.js, JavaScript, Firebase for authentication, Tailwind CSS** for styling, and various other libraries for specific functionalities.

YouTube Clone. Developed a YouTube platform using **React.js, CSS, HTML, and Google YouTube API. Implemented React Router DOM for seamless navigation**, creating a single-page application.

Weather-Forecasting. With The Weather Forecasting user can search locations by city name and observe the weather for the next 5-6 days and 3 hour interval. The app is developed using React.js and material-UI.
