PROJECT EXPERIENCE

Project: Accounting Expert

Role: Junior Software Engineer

Description: The backend of Accounting Expert is on Laravel and this project has no front- end.
In this project I have changed / integrated the theme from old theme to new theme.

Roles and Responsibilities

- Requirement Analysis, customization into Laravel framework.
- Analyzed the project and imported the database accordingly from the previous data.

Environment: Laravel, MySQL.

Project: Handyman Service

Role: Junior Software Engineer

Description: The backend of Handyman Service project is on Laravel and the app side is on IOS and Android and the website is on React. In this project I have changed / integrated the theme from old theme to new theme.

Roles and Responsibilities

- Requirement Analysis, customization into Laravel framework.
- Analyzed the project and imported the database accordingly from the previous data.

Environment: Laravel, MySQL.

Project: Car Washer

Role: Junior Software Engineer

Description: Car Washer is a Mobile Application base project. This project backend side is in laravel and App side at Flutter. This project is for online car washer booking, this is the way car booking is done by the Customer. The booking first goes to the Admin side and then the Admin releases booking for the car washer. After releasing the booking, car washer goes to customer address which is given by customer during booking and hence washes the car without any use of water .After washing the car; washer updated the car booking status using the mobile app.

Roles and Responsibilities

- Requirement Analysis, coding, testing, customization into Laravel framework.
- Analyzed the project and prepared the database accordingly.
- I have created the APIs in this project i.e. total customer booking list, cancel booking list, completed booking list.

Environment: Laravel, MySQL, JQuery, Html, Css

Project: Salon

Role: Junior Software Engineer

Description: In this application, salon service is booked online and appointment has been taken online only. Salon service means any practice carried out in salon that includes but is not limited to, cutting, shaping, polishing or otherwise enhancing that appearance of the nails of the hand or feet, manicuring, predicating callus removal and other skin treatment, waxing and eyebrow threading.

Roles and Responsibilities

- Requirement Analysis, coding, testing, customization into Laravel framework.
- Analyzed the project and prepared the database accordingly.
- Created Signup, login, Laravel Authentication.
- Create backend admin panel for the application, where admin can added new salon and update salon related data.
- Performance optimizations at code, HTML, CSS, and server level to reduce the load time of the website and whole end to end testing and fixing bugs.

Environment: Laravel, MySQL, JavaScript, HTML, CSS.
