PERSONAL PROJECT

Kids E-commerce website

- Developed a comprehensive eCommerce site for children's products using the MERN stack.
- Implemented user-friendly features such as dynamic product catalog, secure user authentication (JWT), shopping cart, and checkout with payment gateway integration (Stripe/PayPal).
- Included an admin dashboard for managing products, orders, and users, as well as customer reviews, ratings, and wishlist functionalities.
- Complete by Using - React, Bootstrap, Node Express and MongoDB.
- Link- <https://firstcrystore.in/>

Online Code IDE

- This project aims to provide a platform where users can write, edit, and execute code in various programming languages directly within their web browser.
- Integrated the Judge0 API for executing user-written code in multiple programming languages such as Python, JavaScript, Java, and C++ etc.
- Incorporated features for saving and loading code snippets, allowing users to revisit and continue their work later.
- Complete by Using - Html, CSS, judge0 Api, Javascript, React and SQL
- Link- <https://code-compiler-ide.netlify.app/>

Top software Company

- Compiled a comprehensive list of leading software companies specializing in IT courses. Each company profile includes detailed information about their course offerings, instructors, and user ratings.
- Integrated a robust system for users to rate and review courses and companies, providing valuable insights and aiding in informed decision-making.
- Ensured a user-friendly interface with secure authentication using JWT, allowing users to create accounts, login, and manage their profiles seamlessly.
- Complete by Using - React, Bootstrap, Node Express and MongoDB.
