Experience

Webkul Software Pvt. Ltd.

Trainee Software Engineer - OpenCart | 02/2024 - 05/2024

- Showcased adeptness in fundamental programming languages including PHP, JavaScript and SQL, effectively catering to a wide array of project requirements spanning diverse domains and industries.
- Contributed to over 10 OpenCart extensions and modules, demonstrating extensive experience and versatility in e-commerce solutions.
- Increased user engagement by 15% by developing AI Search by Image functionality, utilizing Chroma and advanced APIs for vector embeddings.
- Implemented a series of OpenCart customizations, resulting in a 20% reduction in page load times and enhancing user experience.

Padhai ai

Frontend Developer | 05/2023 - 01/2024

- Enforced SEO best practices resulting in a 20% increase in organic search traffic within 3 months.
- Ensured optimal performance and compatibility across devices by collaborating with design team on responsiveness resulting in 10% more users.
- Contributed to a team of 6 developers, submitting over 250 code commits to the company's main repository in 8 months.
- Ensured that the website functioned seamlessly across different browsers by thoroughly testing and debugging for cross-browser compatibility, guaranteeing a smooth user experience for all visitors.

Projects

Connect Circle | PHP, Ajax, MySQL | 04/2024 - Present

- Developed a multifunctional social media platform that facilitates seamless sharing of content among users, enhancing their online interactions.
- Integrated a wide array of features into Connect Circle, ranging from profile updates to text and media posting, comprehensive timeline management, and interactive post functionalities like liking and deletion.
- Leveraging the power of Bootstrap, crafted an intuitive user interface for Connect Circle, ensuring an engaging and easy-to-navigate platform that enhances user satisfaction and encourages prolonged engagement.

Vote Master | PHP, JavaScript, MySQL | 11/2023 - 12/2023

- Developed and maintained an Online Voting System mainly using PHP and MySQL, ensuring secure and efficient user interactions.
- Implemented dynamic status updates based on the current date, facilitating automatic and seamless transitions between active and expired elections.
- Integrated session management for role-based access system distinguishing between Admin and Voter roles, ensuring appropriate access to functionalities.
