EXPERIENCE

Web Development Intern

April – Present

- As a Web Dev intern, my responsibilities involved leveraging HTML, CSS, and JavaScript to design and develop responsive web interfaces, ensuring optimal user experience across devices.
- Collaborated with designers and back-end developers to translate mock-ups into functional web pages, adhering to best practices for code maintainability.

EDUCATION

Jul. 2022 – July 2024 Master of Computer Applications (85%) | Galgotias University

Jul. 2018 – July 2021 Bachelors in Computer Application (72.38%) | SD College, CCSU Meerut

Mar. 2015 – May 2016 Matriculation (83.6%) | MG Public School, CBSE Board

SKILLS

Team Leadership | Management & Coordination | Decision Making | Communication | Confidence and Determination | Openness to feedback | Empathy | Active Listening

Programming: C++ , HTML, CSS, JavaScript, React

Operating System: Windows

Software: MS Office, Visual Studio code, DevC/DevC++

ACADEMIC PROJECTS

The Bat Ball Stump Game

- HTML, CSS, JavaScript
- Simplified, web-based game inspired by cricket In this game, both the player and the computer choose one of three options: Bat, Ball, or Stump. The outcome of each round—whether the player wins, loses, or ties is determined based on these choices. The game interface, created with HTML and styled with CSS, allows the player to select their choice by clicking on buttons representing Bat, Ball, or Stump.
- JavaScript handles the game logic: it captures the player's input, randomly generates the computer's choice, and determines the result according to predefined rules. The result, along with the choices of both the player and the computer, is displayed on the webpage, providing an interactive and engaging user experience.

Fashion – Online Shopping Website

- HTML, CSS, JavaScript
- Online shopping websites often feature user-friendly interfaces, search functions, and secure payment gateways to enhance the overall shopping experience for customers. Additionally, it may offer various shipping options and customer support services to ensure customer satisfaction

Employee Leave Management System

- HTML, Bootstrap, PHP
- This web application helps employees manage their leaves, allowing them to apply & check remaining leaves from the record.
