## Work Experience:

### Associate Analyst – Global Logic

Full-Time

Gurgaon, Haryana  
September 2023 – January 2024

- Conducted a comprehensive analysis of AI-generated e-commerce apparel recommendations for Google, resulting in a 20% reduction in customer returns and a 10% increase in average order value.
- Precise quality analysis, daily task management, and active participation in team discussions.

### Associate Software Developer - Venturepact

Full-Time

Jalandhar, Punjab  
January 2023 – June 2023

- Developed and launched web applications using Front-End technologies. Orchestrated seamless collaboration with cross-functional teams for high-quality web applications. Staying up to date with the latest trends and technologies in web development and implementing them in your work to improve the quality of your web applications.
- Engineered and deployed cutting-edge Front-End technologies tailored to company and user specifications.

### Summer Internship - CipherSchools

Jalandhar, Punjab  
June 2022

- Extensive hands-on experience with React JS for web development, enhancing proficiency in building user interfaces. Implemented React's props system for effective data flow between components, ensuring clear and organized information flow. Gained practical experience in agile development methodologies and became proficient in using version control systems like Git.

## Projects

- **Scout Verse Co.** [Scout Verse Co. \(scout-verse.vercel.app\)](#) Clothing rental platform with Men's and Women's categories, dynamic landing page, sign-in/sign-up, and API integration for garment data and pricing.
- **Instagram Clone:** Cloning of the Instagram with new animations and motions. It includes login and logout just like the same Instagram. It has story add section and view section with all the functionalities. Comprises of dark and light mode.
- **User Suggestions** [NEMESIS \(nemesis-flame.vercel.app\)](#): NEMESIS is a web-based platform designed to provide an innovative experience. It uses modern technologies to deliver a seamless user interface and interactive features. The project focuses on users sharing their interests in movies, garments, and games. It fetches user data through APIs and is optimized for responsiveness on both mobile phones and tablets. This ensures an intuitive user experience across different devices, making it easy for users to connect and share their preferences with others who have similar interests.
- **Learning Management System** [LMS \(lms-1.netlify.app\)](#): SaaS designed for universities and schools, facilitating data management for employers and students. Enables task assignments to students, department allocation to teachers via Admin panel. Utilized React components, replicated Figma design into HTML, and conducted backend data binding, API testing, and GitLab project management.
