Summary

Motivated and detail-oriented software developer with experience in building web applications using Django and Flask, as well as expertise in web scraping techniques. Seeking to leverage my skills in a challenging position where I can contribute to innovative projects and drive impactful results while continuing to grow my technical expertise.

Experience

Python Developer   **March 2023 - July 2024**
Infoedge

- Implemented automated process, tool named AutoSearch, in Python and Selenium to search for company URLs and their respective career pages while maximizing naming cleanliness for enhanced result accuracy.
- Streamlined data processing and reporting workflows through the automation of multiple team reports using Python libraries such as Pandas and NumPy.
- Successfully utilized Python, BeautifulSoup, Selenium, and Scrapy to scrape job information from various career sites. Stored the acquired data efficiently in an SQL database.
- Automated crawling and posting of job listings through the development of scripts to clean and standardize titles and descriptions, resulting in consistent and high-quality job postings.

Skills

Languages: Python,Java,SQL,Html,Css,Javascript,Excel
Frameworks: Django,Flask
Tools and Libraries: Pandas,Numpy,Beautiful Soup,Scrapy,Selenium
Continuous Integration/Continuous Deployment (CI/CD): Jenkins
API Testing & Development: PostMan,RestAPI

Education

Master's in Computer Science   **2021-2023**
DR. APJ ABDUL KALAM UNIVERSITY
Grade: 7.19

Bachelor of Science   **2017-2020**
INDIRA GANDHI NATIONAL OPEN UNIVERSITY
Grade: 51%

Certifications

- Automate the Boring Stuff with Python Programming from Udemy
- Python Django from Udemy

Professional Projects

- **Automation Tool for home ands career url :** Developed and maintained an Automation Tool (Autosearch) using Python, numpy for data manipulation, and various web scraping libraries (Beautiful Soup, Scrapy, Selenium).
  Extracted company names from dashboard APIs, cleaned and searched for home URLs and career URLs using Google search.
  Automated daily report generation for internal teams, integrating Python scripts for data analysis and reporting.
- **Web jobs Project :** Updated and maintained scripts to extract, transform, and manipulate data from internal dashboard APIs.
  Stored transformed data in SQL databases, ensuring data integrity and accessibility.

Personal Projects

- **Blogging Platform Development with django framework:** Designed and implemented a full-featured blogging platform allowing users to create, edit, and manage their blog posts.
  Developed a user authentication system enabling secure login and registration, along with role-based access for authors and admins.
  Created a responsive user interface using HTML, CSS, and JavaScript, enhancing the overall user experience across devices.
  Integrated a rich text editor for seamless post creation, allowing users to format content easily and add multimedia elements.
  Utilized PostgreSQL for database management, ensuring robust data storage and retrieval.
