

Pankaj Kumar Singh

Lead Developer

PROFILE SUMMARY

I have over 12 years of experience in website development, specializing in PHP frameworks like Laravel. I'm skilled in programming languages and tools like AWS, Magento, CodeIgniter, HTML/CSS, JavaScript, MySQL, SQL, Bootstrap, and Core PHP. I also have a strong understanding of SQL and Oracle databases and can efficiently use their query languages to retrieve information.

I'm experienced in using platforms like GitHub and JIRA, and I have a good grasp of data structures, algorithms, and various data types. I'm familiar with software development, from designing and developing to testing and troubleshooting web pages and applications.

Whether it's creating new features or improving existing ones, I'm adept at maintaining clean, functional code. I'm also skilled in integrating data sources and third-party applications into websites to deliver solutions that meet clients' needs and ensure their satisfaction.

EXTRA CURRICULAR

Personal Web Development Projects
Built personal projects such as a portfolio website, blog, or e-commerce platform to showcase technical skills.

problems and enhance application performance.

- Collaborated with project managers to define project needs, set timelines, and deliverables.
- Allocated tasks, established priorities, and ensured timely achievement of milestones.
- Monitored project progress, identified risks, and implemented necessary corrective measures.
- Led and managed a team of PHP developers to foster a collaborative and productive work environment.
- Offered feedback, coaching, and mentoring to facilitate team members' technical skill enhancement and professional growth.
- Conducted regular team meetings to encourage effective communication and knowledge sharing.

Dec 2015 - Mar 2023

Software Development Team Leader
Karam Safety Private Limited

1. Collaborated with design teams across different departments to innovate software solutions, resulting in a substantial improvement in user experience and a 30% increase in overall functionality and performance.
2. Managed the storage, retrieval, and analysis of data to conduct in-depth performance evaluations of MySQL databases over 3 years, leading to the identification of efficiency improvements and cost-saving measures.
3. Teamed up with business analysts, developers, and technical support professionals to comprehensively define requirements for new applications, ensuring alignment with organizational goals and user needs.
4. Worked closely with software development and testing teams to conceive and deliver robust solutions that precisely addressed client requirements for functionality, scalability, and performance, leading to a 25% reduction in post-launch issues.
5. Advised network engineering staff on the assessment of hardware and software requirements for new system development, resulting in a 20% decrease in procurement costs while enhancing system reliability.
6. Orchestrated the recruitment and development of a high-performing team of software engineers and developers, resulting in a 40% increase in project delivery efficiency and overall organizational success.
7. Developed clean, clear, and thoroughly tested code for various projects using PHP, MySQL, and JavaScript, ensuring 100% compliance with industry standards and best practices.

Aug 2014 - Dec 2015

Senior Software Developer
Ennovations Tech Serv

1. Collaborated with other developers to identify and resolve software errors and inefficiencies, ensuring smooth operations.
2. Developed programs from scratch with a strategic, market-centric approach, resulting in reduced waste and

accelerated implementation process.

3. Enhanced and modernized existing code to align with current development standards, leading to decreased operating costs and improved functionality.
4. Executed comprehensive integration testing before the launch of applications to ensure seamless performance.
5. Analyzed requirements and adhered to industry technical standards to design, develop, and deploy software applications for websites.
6. Gathered and defined customer requirements to establish precise project specifications, optimizing project clarity and direction.
7. Liaised with project management personnel to strategize database development timelines and project scope, ensuring efficient coordination and delivery.

Nov 2012 - Aug
2014

Senior Software Developer
New Media Guru

1. Created programs from scratch using a careful, market-focused approach to reduce waste and make the implementation process more efficient.
2. Conducted research, gathered information from various sources, and presented the findings.
3. Developed and implemented strategies and plans to continuously improve performance.
4. Showed respect, friendliness, and a willingness to help in any area needed.
5. Used critical thinking to analyze problems, evaluate solutions, and make decisions.
6. Contributed to continuous improvement by making suggestions and participating in problem-solving activities to support teamwork.
7. Solved problems, improved operations, and provided exceptional service.

Jan 2011 - Nov
2012

Software Developer
Dis India

1. Worked with the marketing department to understand the organization's needs and design web pages that meet those goals.
2. Conducted functional testing throughout the web development process.
3. Juggled multiple tasks to achieve project results, meet deadlines, and fulfill organizational expectations.
4. Used the latest technology, software, and project trends to update and maintain the website's relevance.
5. Provided ongoing maintenance and security updates to keep the website efficient and secure after launch.
6. Tested and reviewed website design to ensure it was responsive, clear, and effective.
7. Created tutorials for website maintenance, content management, updates, and security to help train end users.
8. Managed back-end development using PHP to ensure the website's integrity, security, and efficiency.

Oct 2009 - Jan
2011

PHP Developer

Mar 2009 - Oct 2009

Sopan Tech Solution

1. Creating websites based on client requirements.
2. Managing and updating websites using content management systems (CMS) and custom solutions.
3. Writing code for websites using PHP, JavaScript, and Ajax.

Junior PHP Developer

Saamarth Technologies

1. Designing websites tailored to client needs.
2. Maintaining websites, using both content management systems (CMS) and custom solutions.
3. Programming websites with PHP, JavaScript, and Ajax.

INTERNSHIP

6 Months

Online Event Management System

IT Brain Shapers

Objective: Develop a web application to streamline event planning, registration, and management for users.

Key Responsibilities:

Designed and developed the frontend using HTML, CSS, and Bootstrap for a responsive and user-friendly interface.

Built the backend logic with PHP to handle user authentication, event registration, and data management.

Used MySQL to design and manage the database, creating tables for users, events, and bookings.

Implemented CRUD (Create, Read, Update, Delete) operations to manage events and user profiles.

Integrated email notifications for successful registrations and event updates.

Tested the application for bugs and optimized code for performance and security.

Technologies Used: PHP, MySQL, HTML, CSS, Bootstrap, JavaScript, and AJAX.

Outcome: Successfully developed and deployed a functional web application, improving event management efficiency and user experience.

Projects

82 Days

E-commerce - Helios

Helios Watch Store is a leading luxury watch retailer in India, offering a wide selection of over 40 international and premium Indian watch brands, including TAG Heuer, Versace, and Seiko. The website provides a seamless online shopping experience with services like free battery replacement and EMI options. Customers can easily locate nearby stores and explore educational content on watch trends through the "Watch Journal." Helios continues to offer high-quality timepieces and exceptional customer

service across India.

72 Days

Karam E-commerce

Karamonline.com is a user-friendly e-commerce platform offering a wide range of high-quality personal protective equipment (PPE) and industrial safety products, including helmets, gloves, shoes, and more. The site features a responsive design, secure payment options, and robust customer support, ensuring a seamless shopping experience. Utilizing advanced e-commerce tools like Google Analytics and Magento, KaramOnline.com prioritizes safety and reliability, catering to diverse workplace safety needs.

65 Days

E-commerce-Giesswein

Giesswein is an Austrian family-owned company specializing in high-quality woolen products since 1954. The U.S. website offers a diverse range of merino wool shoes and accessories, including sneakers, slippers, and clothing. The platform emphasizes comfort, sustainability, and innovative design, providing customers with eco-friendly and stylish options. Features include free shipping and returns within the USA, a user-friendly interface for easy navigation, and a commitment to quality and environmental responsibility.

130 Days

Karam KOTS and TRMS

The URL "<https://trms.karamportals.com/>" leads to the login page of Karam Industries' Time and Attendance Management System (TRMS). This system tracks employee attendance, manages leaves, schedules shifts, and generates reports for management. It integrates with HR and payroll systems for accurate data handling. Access is secured through a login page, ensuring only authorized personnel can manage sensitive information.

82 Days

AED.us

AED.us is a leading provider of Automated External Defibrillators (AEDs) and related accessories, dedicated to enhancing public safety through the availability of life-saving devices. They offer a comprehensive selection of new and refurbished AEDs from reputable brands such as Cardiac Science, Defibtech, HeartSine, Philips, Physio-Control, and ZOLL. In addition to AEDs, AED.us supplies essential accessories, including replacement pads, batteries, cabinets, and CPR training equipment. Their mission is to empower every space with life-saving technology, forging stronger links in the chain of survival.

75 Days

Indigo Wild

Indigo Wild, established in 1996, is a Kansas City-based company specializing in natural body and home products. They offer a diverse range of items, including soaps, lotions, candles, and cleaning products, all crafted with plant-based ingredients. Their product line emphasizes sustainability and eco-friendliness, catering to customers seeking chemical-

free alternatives. Indigo Wild distributes its products through both wholesale and retail channels, ensuring accessibility to a wide audience.

55 Days

Event Manager

The project URL "<https://eventmanager.blacktie.com/>" leads to an event management platform built on the Blacktie theme. It provides tools for organizing and managing events, including features for event creation, registration, and ticketing. The platform is designed to offer a user-friendly experience for both event organizers and attendees, with customizable templates, seamless registration processes, and easy event promotion.

65 Days

City Wine

The project URL "<https://www.citywinecellar.com/>" leads to City Wine Cellar, an online retailer specializing in a curated selection of wines, craft beers, and spirits. The site offers a range of products for wine enthusiasts, including premium bottles, gift sets, and accessories. It also provides delivery services and features informative resources to help customers select the perfect beverage for any occasion. City Wine Cellar emphasizes quality, customer service, and a refined shopping experience for wine and spirits lovers.

85 Days

Vision Rx Lab

The project URL "<https://www.visionrxlab.in/>" leads to Vision Rx Lab, an Indian-based eyewear and optical solutions provider. The platform offers a wide range of high-quality prescription eyeglasses, sunglasses, and contact lenses, catering to various needs and preferences. Vision Rx Lab focuses on delivering personalized eye care services, including advanced eye testing, lens customization, and stylish frames. With a commitment to innovation and customer satisfaction, the site aims to provide an enhanced shopping experience for individuals seeking premium eyewear products.

72 Days

VANI

The project URL "<https://vaniindia.org/>" leads to the official website of VANI (Voluntary Action Network India), a national network of non-governmental organizations (NGOs) in India. VANI works to promote the development of the voluntary sector by providing a platform for advocacy, capacity building, and collaboration. The organization supports NGOs in strengthening their impact, enhancing transparency, and engaging with government policies. Through its initiatives, VANI aims to foster a stronger civil society in India and contribute to the country's social development goals.

ADDITIONAL INFORMATION

Additional Information

- Led a team of software developers to build applications for insurance

clients.

- Ensured the team stayed on track and delivered high-quality applications.
- Organized team meetings to review progress and plan coding strategies.
- Contributed to discussions on prioritizing development tasks.

○ **Accomplishments**

- Tested products with consumers to identify and fix issues.
- Supervised a team of seven staff members.
- Collaborated with a team of three to create TRMS software.
- Used Microsoft Excel to create spreadsheets for tracking inventory.
