

SANDEEP

Full Stack Web Software Developer

New Delhi • +91 8950828257 • sndeepsn@gmail.com

SUMMARY

Dynamic and detail-oriented Web Software Developer with 4 years of experience specializing in HTML, CSS, JavaScript, SQL and PHP. Proven expertise in designing and developing responsive websites, web applications, and dynamic user interfaces. Adept at implementing innovative solutions to optimize performance, enhance user experience, and meet client requirements. Skilled in collaborating with cross-functional teams, managing project timelines, and delivering high-quality, scalable code. Committed to staying updated with emerging technologies and delivering impactful digital solutions.

WORK EXPERIENCE

PHP developer, Fujiyama Power Systems Pvt. Ltd.

Jan 2024 - Present

- Build and maintain end-to-end web applications using front-end technologies like HTML, CSS, and JavaScript, and back-end frameworks in PHP, ensuring seamless integration and functionality.
- Ensure the performance, scalability, and reliability of applications by optimizing database queries, server-side processes, and front-end load times.
- Work collaboratively with UI/UX designers, back-end developers, and project managers to deliver user-friendly and feature-rich web solutions aligned with business goals.
- Write clean, well-documented code, conduct code reviews, and implement security best practices to safeguard applications from vulnerabilities.
- Oversee the entire software development lifecycle, from gathering requirements and planning to deployment and maintenance, ensuring timely delivery of projects.
- Develop and integrate RESTful APIs and third-party services to enhance application functionality and interoperability with external systems.
- Continuously research and implement the latest tools, frameworks, and best practices in full-stack development to improve efficiency and deliver cutting-edge solutions.

Jr. Web Developer, Sequelone Solutions Pvt.

Oct 2021 - Dec 2023

- Support the development and maintenance of websites and web applications using HTML, CSS, JavaScript, and PHP, ensuring functionality and responsiveness.
- Identify and fix front-end and back-end issues in web applications to ensure smooth performance and error-free functionality.
- Work under the guidance of senior developers and team leads to implement features and meet project deadlines effectively.
- Perform testing to ensure cross-browser compatibility, responsiveness, and adherence to design specifications.
- Contribute to team code reviews to improve coding standards, learn best practices, and enhance overall quality.
- Stay up-to-date with industry trends and acquire knowledge of new frameworks and tools to expand technical expertise and improve workflow.
- Help in connecting and configuring APIs and external services to improve application features and ensure smooth data flow across systems.
- Work closely with designers to develop intuitive and responsive interfaces, prioritizing user accessibility and adherence to design guidelines.

Intern, Sequelone Solutions Pvt. Ltd..**May 2021 - Oct 2021**

- Deepen expertise in front-end and back-end technologies, including HTML, CSS, JavaScript, and PHP, by contributing to real-world web development projects.
- Gain hands-on experience in integrating APIs and third-party services to add functionality and streamline data flow in web applications.
- Collaborate with designers to create responsive and user-friendly interfaces, enhancing the usability and accessibility of web applications.
- Tackle more complex debugging tasks and performance optimisations, developing a proactive approach to addressing technical challenges.

Intern, Samvedna Trust.**Nov 2020 - Apr 2021**

- Learned and assisted to create and maintain web pages using HTML, CSS, and JavaScript, while understanding the fundamentals of coding and debugging.
- Observe and participate in team projects to grasp project workflows, requirement gathering, and the collaborative dynamics of a professional environment.
- Engage in testing and troubleshooting web applications to develop a structured approach to identifying and resolving technical issues.
- Actively participate in training sessions and team discussions to explore industry best practices, emerging technologies, and professional workflows.

PROJECTS

- Worked on HONO (HCM & HRMS Software)
- Custom CRM for In-house Brand (Fujiyama Power System PVT Ltd.)
- Inbound Call, Data, Response integration tool for the CRM stated above
- Dynamic Ou Master Configurations
- Marketing Module with Automated Response
- Custom API Repository
- Dynamic Company Directory
- Dynamic database detail Fetch, Pull, Push Software

SKILLS

- | | | |
|--------|--------------|------------------|
| • PHP | • JavaScript | • UI/UX |
| • HTML | • SQL | • Product Design |
| • CSS | • API | • Debugging |
