Profile Summary

With over two years in web development and maintenance, I've refined my skills in building and managing websites, ensuring smooth and efficient operation. My experience spans front-end and back-end technologies, enabling me to troubleshoot issues and implement updates that enhance user experience and site performance.

Work Experience

Software Developer
Akshamaala Solutions Pvt. Ltd. (Unnati)
07/2023 - 01/2024

My role involves several key tasks, such as updating the user interface, collecting and analyzing data, and maintaining the website's functionality. These responsibilities are essential for improving the user experience and ensuring the site operates smoothly.

Junior Web Developer
Bhartipay Services Pvt ltd (Pay10)
06/2021 - 07/2023

I handle key responsibilities such as creating and integrating plugins, performing thorough testing, and keeping websites up to date. I interact with clients to offer assistance and make sure their needs are met effectively. Additionally, my role involves developing APIs, crafting SQL queries to enhance database efficiency, and managing different content management systems like WordPress and Magento to elevate user experiences.

Website For Medical Shop

6 Months

The website features customer information along with detailed descriptions of various medications and their uses. Each entry provides a concise overview, ensuring that users can easily understand the purpose and benefits of the medicines listed. This comprehensive approach not only enhances user experience but also facilitates informed decision-making regarding health and wellness.
