CAREER OBJECTIVE

A highly motivated Web Developer with 1.8 years of experience in backend development using PHP, CodeIgniter, and Laravel frameworks. Looking to contribute technical expertise to an innovative organization that values modern technology, teamwork, and efficient, scalable solutions.

TECHNICAL SKILLS

- Web Technologies: PHP (CodeIgniter 4, Laravel 8), HTML, CSS, JavaScript, Python, MySQL, REST API, Bootstrap
- Frameworks & Libraries: Bootstrap, jQuery
- Tools & Version Control: Git-Bash, GitHub
- Database Management: MySQL

PROFESSIONAL EXPERIENCE

Web Developer at IDM Valley

March 2023 – Present

- Developing and maintaining dynamic web applications using PHP (CodeIgniter & Laravel).
- Implementing REST APIs and backend logic for high-performance applications.
- Enhancing interactivity and functionality by integrating JavaScript, Bootstrap, and jQuery.
- Collaborating with cross-functional teams to meet client requirements and deadlines.

KEY PROJECTS

HRMS Modules Development

Role: Backend Developer

Technologies Used: PHP (Laravel), MySQL, REST API

Description: Developed key HRMS modules for a complete Human Resource Management System, which is used for managing employee records, payroll processing, leave tracking,

and performance evaluations. The software automates HR processes, improves efficiency, and ensures compliance with company policies.

Responsibilities:

- Built secure authentication with role-based access control.
- Integrated automated report generation and notifications for employee status updates.
- Designed REST APIs for frontend integration and third-party services.

InstaFeed - Live News Feed Platform

Role: Full-Stack Developer

Technologies Used: PHP, JavaScript, Bootstrap, REST APIs, jQuery

Description: Developed 'Instafeed,' a live news feed web application. Designed and built both frontend and backend infrastructure, ensuring a seamless user experience.

Responsibilities:

- Built a secure and efficient backend with user authentication and session management.
- Designed custom REST APIs to fetch and display real-time news content dynamically.
- Developed an admin panel for content moderation and news management.

Jashna - Event Management Platform

Role: Backend Developer

Technologies Used: PHP (CodeIgniter), JavaScript, Bootstrap, jQuery, REST API

Description: Developed a comprehensive event management platform for Jashna, allowing seamless event creation, attendee management, and bookings.

Responsibilities:

- Developed essential CRUD operations to manage events and attendees.
- Created and optimized REST APIs for frontend-backend communication.
- Ensured performance and security optimizations for a smooth user experience.

FantasticalUAS - E-Commerce Platform

Role: Backend Developer

Technologies Used: PHP (Laravel), MySQL, REST API, Bootstrap

Description: Developed a fully functional e-commerce platform, handling product management, orders, and user authentication.

Responsibilities:

- Built a robust backend, including inventory management and order processing.
- Implemented secure payment gateway integration.
- Designed an admin panel for efficient management of products and users.
- Optimized database queries for improved performance.

ACHIEVEMENTS & ACCREDITATIONS

- Successfully coordinated and volunteered in college events, demonstrating strong organizational skills.
- Recognized for a strong sense of responsibility and independent work ethic.

ACADEMIC QUALIFICATIONS

- Bachelor of Science (Computer Science), DAV Centenary College, Faridabad (Approx. 60%)
- 12th (Non-Medical), Vidya Niketan School, Faridabad
- 10th, Vidya Niketan School, Faridabad (70%)

DECLARATION

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
