PROJECTS

Fully Functional E-Commerce Store [↗](#) | React,Redux,Node,MongoDb,Cloudinary,Tailwind CSS,JavaScript

- The application allows users to register, log in, reset passwords, browse products, add to cart, checkout, and pay securely using Stripe. Admins can manage products, orders, reviews, and track metrics via data visualization using Chart.js. Cloudinary is used for efficient image storage and management, with users able to update profiles and leave product reviews.

Microservices-Based Authentication System using Django [↗](#) |

- Independently designed and developed a microservices-based system enabling users to securely create accounts and log in via an Auth Service with role-based access control. Users can perform role-specific CRUD operations on tasks through the Task Service and access resources based on their roles via the Resource Service. Ensured seamless communication between services using RESTful APIs and optimized the architecture for scalability and security with Docker.
