Experience

Benepik Technology | Gurgaon, Haryana
Software Engineer | 11/2023 - Present
Proficient in **Python** and PHP, I have developed key modules such as **Schedule Reward** and **Insights**. Currently, I am independently leading the development of *Benepik Plus* — a robust, end-to-end **dynamic** application designed for **real-time transactions**, secure redemptions, bank transfers, and Visa processing. The platform features strong validations, advanced authentication mechanisms, and delivers a seamless, secure experience for all reward-related redemption operations.

Ikargos Cargosite Ventures Private ltd | Delhi, Delhi
Associate Software Engineer | 02/2023 - 06/2023
Responsible for creating **apis** in **Django** and **Springboot**, **Optimization** of **functionalities**, fixing bugs,created **Dashboards** for analysis ,created **machine learning models** and **integration.**

Simplify360 | Bengaluru, Karnataka
Data Analyst Intern | 09/2022 - 02/2023
Figuring out insights from large chunks of **Hero Motocorp** Data, and created reports using Data mining and cleaning through **Python**

Skills

Python Programming, Django, Data Structures and Algorithms, PHP, Git, Postman, Elastic search, Docker, Redis, MySQL, JavaScript, Machine Learning

Education

Vishveshwarya Group of Institutions | Noida, Uttar Pradesh
Computer Science and Engineering | 08/2023
82.4% overall aggregate

Children Senior Secondary School | AZAMGARH, Uttar Pradesh
Class XII | 04/2019

Children Senior Secondary School | AZAMGARH, Uttar Pradesh
Class X | 05/2018

Certificates

Machine learning from Technex IIT BHU, Data Visualizations from Great Learning , Python Programming from Great Learning, Cognizant Artificial Intelligence Virtual Internship Program

Acheivments

Aspire Internship from Government of India in SRMS Unnao., Cultural and Sports head of VGI, Prime member of Peer-to-Peer group and T&P office Vgi, Cricket team Captain of VGI and winner of Zonal Tournament, Placement Coordinator

Projects

Benepik Plus - Benepik Plus is an end-to-end application for **real-time transactions**, **redemptions**, **bank transfers**, **Visa processing**, and all aspects of reward redemption and purchasing.

Schedule Reward (BPCP) - This is a client Panel which have a **real time schedule reward** for the users on the basis of their levels, designations , department and attached with certificates , recognition mails and different amounts and different catalogued rewards.

Insights (BPSA) - An end to end microservice for figuring out insights, reconciliation , dashboards and automated audits.

Smarten Project - This is basically a **web app** which helps in managing Admins, Dispatchers, Distributors, Sub-Distributors, Dealers, and Customers at different level of access, authentication and authorization of **SMARTEN GROUPS**
