

# SAGEER ANSARI

## Web Developer

Faridabad, Haryana 121003

[bittuforu24@gmail.com](mailto:bittuforu24@gmail.com)

+91 97167 33614

I'm excited to bring my skills in web development and my passion for problem-solving to a team where I can contribute to building great websites and digital experiences. I'm eager to grow alongside the company, learning new things while helping drive its success through creative and efficient solutions.

## Work Experience

---

### Web Developer Intern

Webiant Digital India Pvt Ltd.-Noida, Uttar Pradesh

Internship

November 2024 to May 2025 • Internship

Building and maintaining web applications using the Laravel framework. My key responsibilities typically include:

1. Backend Development: Writing clean, scalable, and efficient code to develop server-side logic and implement features based on project requirements.
2. Database Management: Designing, creating, and managing databases (e.g., MySQL, PostgreSQL) and handling data migrations, relationships, and queries.
3. API Integration and Development: Building and integrating RESTful APIs, ensuring smooth communication between the front-end and back-end systems.
4. Routing and Middleware Management: Creating and managing routes, controllers, and middleware to handle HTTP requests, including validation, authentication, and authorization.
5. Testing and Debugging: Writing unit tests, performing code reviews, and debugging issues to ensure the application runs efficiently and bug-free.
6. Security Best Practices: Implementing security protocols such as encryption, authentication, and authorization to protect sensitive data and prevent attacks.
7. Performance Optimization: Analyzing and optimizing code and queries to ensure the application performs efficiently, especially when handling large amounts of data or high traffic.
8. Version Control: Using version control systems like Git to collaborate with other developers and manage code changes in an organized manner.
9. Collaborating with Others: Working closely with developers to integrate user-facing elements with server-side logic.
10. Staying Updated: Keeping up-to-date with new features, tools.
