INTERNSHIPS:

- **Intern Trainee at OnGraph Technologies: 6 months**

Contributed to various projects utilizing PHP and gained valuable experience in creating websites using the WordPress CMS.

- **Online training at Internshala: 3 months**

Had taken the course of web development, created website from scratch during college third year: php, bootstrap, html, css

PROJECTS

1. <https://bo.sendinblue.com/>

This project come under Brevo , this application created using **zend, mysql, mongo, jquery, ajax , html** etc

Back-office application is used for internal use only, this contains the major information about the brevo product , like the list of the users connected with the product, information of each user like their account settings, purchase history, connected users ect, all product list, all the purchased order ect.

From the help of this application our support team or developer can access client data, update their information, edit order status , and can view Purchase history.

Also using this application , a person from the support team can handle customer complaints and queries.

2. <https://app.brevo.com/>

This product is handled by multiple git repositories , the whole product has multiple pages and each page has its own unique repository. which was created using the symfony framework.

We have worked majorly on the product features like: Login, logout , change password , update profile, User management. settings page, purchase product, add into the basket, purchase history, apply coupon etc

Added and Updated many functionalities related to these pages.

Technology used: **zend and symphony framework. mongoDb, Mysql, github**

3. <http://49.50.73.242/dhbvn1/> (core php):

About: Created a CRM for Haryana Bijli Vibhag in core php. Created functions like, login , signup, register complaint, view registered complaint, delete complaints, dashboard for admins, send sms , email alerts, feedback after resolution.

The whole process of managing complaints related to Haryana Bijli and customers and admins.

Technology used: **Core PHP, Mysql ,OOP**

4. <https://echo.ilbs.in/> (codeigniter php):

About: It is the Website of a liver institute ILBS. Contains multiple pages like Home, about , academics, sessions, contact us. Maintain frontend part by admin dashboard. So that all content could be dynamic.

Technology used: **Codeigniter PHP, Mysql , jquery**

5. [Website for medical shop Jaipur \(Wordpress\)](#)

Functionality used: Created different pages, post type, custom fields, contact form.

About: Show all medicines available fetched from database, Created custom plugin. Made each content dynamic.

6. Quotenerds Wordpress Form (Wordpress):

About: wordpress multi step form for home, car insurance, send data into api Technology used: Wordpress,PHP
