EDUCATION

Modern Institute of Technology and Research Centre

Bachelor of Technology in Computer Science (SGPA - 8.96)

Alwar, Rajasthan

Aug. 2018 – October 2022

Sri Guru Harkrishan Public School

Secondary Higher Education(PCM) (Percentage - 75.8)

Alwar, Rajasthan

March 2017 – May 2018

WORK EXPERIENCE

In Time Tec

Software Engineer

Dec. 2024 – Present

Jaipur, Rajasthan

- Developed and maintained software solutions in Python for MIMO monitors, enabling seamless communication between cloud applications and devices.
- Worked on hardware integration projects to enhance device functionality and enable real-time data exchange with cloud platforms.

ZeltaTech Pvt. Ltd.

Associate Automation QA Tester

April 2024 – Nov. 2024

Jaipur, Rajasthan

- Improved data workflows by automating reports and dashboards using Python and SQL, saving 30 percent of time spent on manual reporting.
- Built a FastAPI backend in Python to efficiently extract and visualize data from a MySQL database, improving data accessibility by 25 percent and enabling faster, data-driven decision-making.
- Enhanced test coverage by 40 percent by designing and implementing automated test scripts using Python, Selenium, and Appium.

Sardeck Services Pvt. Ltd.

Associate Engineer

Nov. 2022 – March 2024

Jaipur, Rajasthan

- Developed 3 projects utilizing the FastAPI framework, improving backend performance and scalability.
- Adopted Python and FastAPI technologies, resulting in a 25 percent increase in development efficiency by streamlining API creation.
- Resolved complex backend challenges, streamlined processes, and accelerated project delivery timelines.

Wipro

Java/J2EE Internship

March 2022 – May 2022

- Built expertise in Java/J2EE, specializing in debugging and resolving code issues to optimize application performance.

PROJECTS

Gaming Arcade | Python, Appium, Selenium

April 2024 – Nov. 2024

- Developed Python-based test scripts to automate functional testing, covering user login, game selection, in-game purchases, and leaderboards, reducing manual testing time by 30 percent.
- Guaranteed seamless performance across devices, operating systems, and browsers, improving cross-platform reliability.
- Link to Project :- gamingarcade.io

ChatAPP | Python, FastAPI, HTML, CSS, React, JS, PostgreSQL

Sept. 2023

- Built a real-time chat application using the FastAPI framework, enabling users to send and receive messages via WebSocket with zero message latency.
- Integrated PostgreSQL for optimized message storage, enhancing both application scalability and performance.

TECHNICAL SKILLS

Languages: Python, SQL, Java, Javascript, HTML/CSS

Frameworks: FastAPI, Appium, Selenium, Django

Developer Tools: Git, PyCharm, IntelliJ
