Work Experience

PHP/CodeIgniter Developer Intern

I Parable

📅 November 2024 – Present

- Developing web applications using PHP and CodeIgniter 4, aligned with Agile development practices.
- Building and integrating RESTful APIs, managing database interactions with MySQL
- Actively involved in debugging, testing, and performance optimization of core modules.
- Participating in sprint planning, daily stand-ups, and code reviews to ensure timely and high-quality delivery.
- Tools & Technology : *PHP, CodeIgniter, MySQL, HTML, CSS, JavaScript, Git, Postman.*

Projects

•ERP System – (Swamatics - Manufacturing Company)

Role: Full Stack Developer | Tech: PHP, CodeIgniter 4, MySQL, JavaScript, HTML5, CSS3

Developed a customized ERP system to automate manufacturing operations including inventory, sales, order, and accounting modules. Implemented CRUD operations, role-based access (Admin/User), and integrated reporting dashboards for real-time insights. Improved workflow efficiency, reduced manual errors, and enabled data-driven decision-making across departments.

•Project Management System

Role: Full Stack Developer | Tech: PHP, CodeIgniter 4, MySQL, HTML5, CSS3, JS, Bootstrap

Designed and built a project management tool with admin and user panels for project tracking, deadline monitoring, and progress updates. Implemented CRUD features, responsive UI, and role-based access to ensure efficient project flow.

•Restaurant Management System

Role: Full Stack Developer | Tech: PHP, MySQL, HTML, CSS, JavaScript

Created a system for managing restaurant operations including order processing, inventory control, and customer feedback. Automated billing and stock tracking to enhance operational efficiency.

Swamatics Website (<https://swamatics.com/>)

Role: Full Stack Developer | Tech: React, JavaScript, HTML5, CSS3, REST API

- Developed a responsive corporate website for Swamatics using React. Built dynamic UI components, integrated backend APIs for real-time content updates, and optimized performance for cross-device compatibility and faster load times.

Technical Skills

- Programming Languages: PHP, CodeIgniter(PHP framework), Node.js, Express.js
- Web Development: HTML5, CSS3, JavaScript, React.js, Bootstrap
- Database Management: MySQL, SQL, MongoDB
- Version Control: Git, GitHub
- Other Skills: Strong analytical & problem-solving abilities, Excellent communication & teamwork skills
